

# DOWNEY UNIFIED SCHOOL DISTRICT ELEMENTARY REPORT CARDS – CCSS

Prior to entering your grades into the Elementary Report Cards system you will need to setup your standards. The process allows you to *enable* or *disable* each standard depending upon whether or not it was assessed during the current trimester.

When a standard is disabled, “NA” will appear in the current trimester column for that standard on your report card grade entry screen, as well on the printed report card.

When a standard is enabled, indicating that it was assessed during the current trimester, in place of “NA” a check box will appear in the current trimester column for that standard, and you will be able to check the box to indicate that the student had difficulty with the standard, or leave it unchecked to indicate that the student did not have difficulty. When you enable/disable a standard, it is set for your entire class. You only need to perform the setup process once, unless you decide at a later point to change one or more of the standards settings.

### ***Enabling/disabling a standard will not affect saved check marks***

This means that if you enable a standard, enter check marks on your report cards for the standard and save them, then decide to disable the standard, the check marks will not be automatically deleted, as in past versions of the system. If you once again enable the same standard, you will see that any check marks previously entered will still be there.

### Setting Up Your Standards

While the standards available vary somewhat for different grade levels, the process of enabling/disabling them is the same, regardless of the number of standards your grade level uses.

To setup your standards follow the simple steps outlined below:

1. Log into the Elementary Report Cards system.
2. From the report card entry screen, click the link in the upper right hand corner titled *Setup Standards*.

The screenshot shows the 'REPORT TO PARENTS - GRADE 4' interface. At the top right, there are buttons for 'Log Out', 'Class List', and 'Setup Standards' (which is circled in blue). Below these are fields for 'Student Name' (Alfonso, William), 'Teacher' (Fishing), 'School' (Carpenter Elementary School), and 'School Year' (2014-2015). There are also navigation buttons: '<< Previous', 'Next >>', and 'Save'. The user's name 'Amaya, Cristian V' is displayed. At the bottom, there is a table header for 'EFFORT GRADES FOR THE FOLLOWING AREAS' with columns for 'T1', 'T2', and 'T3'. The first row is for 'English/Language Arts & Literacy' with a dropdown menu showing 'F'.

3. On the Standards Setup screen, check the box to the left of the description for each standard that you want to enable, or un-check the box if you wish to disable a standard.

**ENABLE STANDARDS**

For standards that are being assessed this trimester, check the corresponding check box to the left of the description. This will display a check box on the grade entry screen where you can indicate whether or not the student is experiencing difficulty with the standard.

**DISABLE STANDARDS**

For standards that are not being assessed this trimester, un-check the corresponding check box to the left of the description. This will display "NA" on the grade entry screen as well as on the printed report card. For standards that are being assessed this trimester, check the corresponding check box to the left of the description. This will display a check box on the grade entry screen where you can check the box to indicate difficulty.
